

New MRL Lift for a stylish London workspace

The market for flexible serviced offices and workspaces has continued to evolve over the past years and with the recent changes in office-based working, the advantages of flexible workspaces can be even more appealing. Cargo Works is one of London's leading flexible workspace providers with 58 London properties, serving over 3,000 businesses.

Recently, Jackson have installed a new MRL 5-stop passenger lift in the Cargo Works contemporary office space at 1-2 Hatfields, SE1, a former bonded warehouse situated close to the South Bank complex in Waterloo.

The four-storey plus rooftop studios and basement building has recently undergone a major renovation which included the installation of a new lift. Our initial task was to undertake a site survey and discuss the technical specifications with the client.

We subsequently provided a detailed cost and time frame proposal, and were delighted to receive the contract award. Installation works were successfully completed during 2021.
